RANGE

T4f TIER 4 FINAL
COMPLIANT

IDRF-080 GENERATOR

The Inmesol Rental Range generators are designed and manufactured to supply constant heavy-duty power under extreme conditions, while meeting and exceeding all Tier IV environmental regulations. With a service range of 35 kVA – 2,500kVA, our line up will cover the needs of your project, all while setting the standard in diesel consumption, low service requirements, and in industry leading noise reduction.

Need portable power? Join our Pack.

FEATURES

- Tier IV final Deutz diesel engines in all systems
- Whisper quiet with sound ranges from 65-75 dBA
- Cold weather kits installed in all systems
- Additional sizes available upon request
- Up to 450L fuel tank and heavy duty skid
- Optional GSM/GPS tracking devices available

“Inmesol generators provide peace of mind for our company and customers. The state-of-the-art design, air quality control and user friendly interface allows for top tier performance and minimal downtime.”

Craig Bauslaugh, Operations Manager
at Bigfoot Crane Company Inc.
